SUBJECT INDEX

Articles appearing on AJKD ELECTRONIC PAGES are referred to by journal number, a colon, the letter E, and a number.

Page references to Supplement 1 (August 2004) and Supplement 2 (November 2004) are preceded, respectively, by S1: and S2:.

- Acceptability, of HD in renal satellite units in England and Wales, 121–131
- Access, vascular. *See* Vascular access
- Access to care
 of hemodialysis in renal satellite units in England and Wales, 121–131
 renal transplantation among American Indians and Hispanics, 334–352
- ACE deletion allele polymorphism, cardiovascular risk and, 466–476
- ACE inhibitors. *See* Angiotensin-converting enzyme inhibitors
- N-Acetylcysteine, for radiocontrast-induced nephropathy prophylaxis, 12–24
- Acidosis, effect of predialysis serum bicarbonate on mortality and hospitalization risks, 661–671
- Acquired cystic kidney disease, xanthogranulomatous pyelonephritis in anephric patient, 930–936
- Acute renal failure (ARF)
 and cerebral infarcts in young woman, 179
 chronic crystal-forming interstitial nephritis, tosylloxacin tosylate and, 902–907
 herbal therapy and, 1–11
 high-dose furosemide for, 402–409
 hospital-acquired, radiocontrast-induced, prophylaxis for, 12–24
 in hospitalized elderly, prognosis for, 410–419
 intermittent versus continuous dialysis for, 1000–1007
 mortality, in inherited epidermolysis bullosa, 651–660
 in propofol infusion syndrome, 6:E98
 transjugular renal biopsy and hemodialysis catheter placement in, 429–436
- Acute tubular necrosis risk, from herbal therapy, 1–11
- Adequacy, of peritoneal dialysis, 2:S36–40
- Adherence to treatment, religiosity in hemodialysis population and, 488–497
- Adolescents with anemia of chronic kidney disease, health-related quality of life of, 1017–1023
- Adrenal ganglioneuroma, with membranoproliferative glomerulonephritis, 363–368
- Advanced glycation end products, medial smooth muscle cell injury in diabetic nephropathy and, 224–238
- African Americans, ESRD from focal segmental glomerulosclerosis in, 815–825
- Aging
 cardiovascular risk factor relationship with microalbuminuria and, 25–34
 renal biopsy abnormalities and, 618–626
- Albumin, serum
 adult in-center hemodialysis patients and, 2:S18–36
 effect of hemodialysis modality on plasma fibrinogen level, 941–949
 mortality risk and, 2:S14–15
 pediatric patients in-center hemodialysis and, 2:S51
 peritoneal dialysis patients and, 2:S40–44
- Albumin, urinary. *See* Microalbuminuria
- Aldosteronism, calcium nephrolithiasis associated with, 1:E7
- Alkylating agents, immunosuppression for idiopathic membranous nephropathy and, 385–401
- Allograft dysfunction, reversible, fenofibrate-associated, 543–550
- Allograft nephropathy, C₂ monitoring of cyclosporine A exposure and, 886–892
- American Indians, access to renal transplantation, 334–352
- Amino acids, inflammation and mortality in CKD patients starting hemodialysis, 455–465
- Amyloidosis
 in inherited epidermolysis bullosa, renal disease mortality and, 651–660
 with novel mutant Leu64Pro, 1103–1109
- ANCAs. *See* Antineutrophil cytoplasmic antibodies

- Anemia
 epoetin requirements in predicting mortality in HD, 866–876
 HRQL in adolescents with chronic kidney disease and, 1017–1023
 management
 of in-center hemodialysis pediatric patients, 2:S48–50
 and outcome in 12 countries, 94–111
 in peritoneal dialysis, 2:S40–44
 red blood cell survival in chronic renal failure, 715–719
 Angioplasty, vascular access stenosis in arteriovenous grafts versus fistulas, 859–865
 Angiotensin-converting enzyme deletion allele polymorphism, cardiovascular risk and, 466–476
 Angiotensin-converting enzyme inhibitors
 in IgA nephropathy, exercise and, 257–263
 potassium in CAPD patients and, 738–746
 Angiotensin receptor blockers, potassium in CAPD patients and, 738–746
 Anion exchanger protein
 monogenic renal calcium-stone disorders and, 963–986
SLC4A1 mutations in autosomal recessive distal renal tubular acidosis and, 64–70
 Anterior ischemic optic neuropathy, in calcific uremic arteriolopathy, 6:E93
 Antibiotics
 for dialysis-catheter related bacteremia, 779–791
 empiric therapy for peritoneal dialysis-related peritonitis, 559–561
 expanded-spectrum β -lactamase producing *Klebsiella pneumoniae*-related peritonitis, 6:E102
 hypotension unmasked by β -lactamase during dextran sulfate LDL apheresis and, 6:E107
 in peritoneal dialysis-related peritonitis prevention, 591
 Anticoagulation
 immobilization hypercalcemia and bone resorption in CRRT, 1110–1114
 serum concentrations, effect of dialysis membranes on, 509–516
 Anti-EPO antibody levels, in chronic kidney disease after epoetin alfa therapy, 264–269
 Antifactor Xa
 enoxaparin anticoagulant activity in ESRD and, 270–277
 serum concentrations, effect of dialysis membranes on, 509–516
 Antigen presentation, lack of monocytes in pulmonary renal syndrome and, 556–558
 Antineutrophil cytoplasmic antibodies (ANCA)
 polyangiitis syndrome, hemoperitoneum in, 908–911
 renal vasculitis, mizoribine for, 57–63
 Antioxidants, for radioccontrast-induced nephropathy prophylaxis, 12–24
 Antiphospholipid syndrome, acute renal failure and cerebral infarcts in, 179
 Anti-rHuEPO antibodies, resumption of epoetin alfa after rituximab therapy for pure red cell aplasia, 757–761
 ApoE polymorphism, serum lipids in hemodialysis patients and, 300–308
 Apolipoprotein A-I amyloidosis, with novel mutant Leu64Pro, 1103–1109
 Apolipoprotein E, serum lipids in hemodialysis patients and, 300–308
 Aquaporin 1, peritoneal distribution/expression in PD patients, 146–154
 ARF. *See* Acute renal failure
 Aristolochic acid-associated nephropathy, herbal therapy and, 1–11
 Arrhythmias
 ventricular, during and after hemodialysis, coronary stenosis and, 328–336
 Arrhythmias, effect of iron stores on QT_c dispersion in PD patients, 720–728
 Arteriosclerosis, coronary artery calcification scores during PD, 517–528
 Arteriovenous fistula (AVF)
 intra-access blood flow in, 850–858
 surgical banding effects on, 1090–1096
 vascular access stenosis and, 859–865
 Ascorbic acid, oxalate absorption and endogenous synthesis from, 1060–1069
 Asia *bogorensis* peritonitis, identified by 16S ribosomal RNA sequence analysis, 2:E15
 Atazanavir, acute interstitial nephritis associated with, 5:E81
 Atkins weight-loss diet, effects on kidney and kidney disease, 950–962
 Autoinfarction, spontaneous mediastinal parathyroid autoinfarction after parathyroidectomy, 762–767
 Autologous stem cell transplantation, for light chain deposition disease, 551–555
 Automated peritoneal dialysis, versus continuous ambulatory peritoneal dialysis, 132–145
 Autosomal dominant medullary cystic kidney disease, type I in large Native-American kindred, 611–617
 Autosomal dominant polycystic kidney disease, exercise blood pressure, cardiac structure and diastolic function in normotensive patients, 216–223
 Autosomal recessive distal renal tubular acidosis, *SLC4A1* mutations in, 64–70
 AVF. *See* Arteriovenous fistula
 Bacteremia, dialysis-catheter related bacteremia, 779–791
 Bacterial endocarditis, long-term survival in dialysis patients and, 1077–1082
 Baroreflex impairment, in chronic kidney disease and, 446–454
 Beck Depression Inventory, evaluation of depression mortality risk in CKD with heart failure, 207–215
 Behavior, dialysis staff problems in dealing with difficult patients, 893–901
 β -lactamase
 expanded-spectrum, producing *Klebsiella pneumoniae*-related peritonitis, 6:E102
 hypotension during dextran sulfate LDL apheresis and, 6:E107
 Bicarbonate, predialysis levels and risk of mortality and hospitalization, 661–671
 Biofilms, xanthogranulomatous pyelonephritis in anephric patient, 930–936
 Biopsies, aquaporin 1 distribution/expression in peritoneum of PD patients, 146–154

- Blood flow
 dialyzer delivered, effect of blood tubing sets on, 498-508
 intra-access
 surgical banding of AVF and, 1090-1096
 in under-arm native AVF, 850-858
- Blood pressure. *See also* Hypertension
 APD versus CAPD effects on, 132-145
 in CRF, effect of n-3 PUFA on, 77-83
 during exercise in normotensive ADPKD patients, 216-223
 hypotension, AION in calcific uremic arteriopathy and, 6:E93
- Blood temperature monitoring, during hemodialysis, 155-165
- Blood tubing sets, influence on delivered dialyzer blood flow, 498-508
- Body temperature regulation, during hemodialysis, 155-165
- Bone disease
 histologic patterns after kidney transplantation, 747-756
 mortality risk in dialysis patients with hip fracture, 672-679
- Bone mineral density
 cyclic intermittent etidronate effect on coronary artery calcification in HD, 680-688
 monogenic renal calcium-stone disorders and, 963-986
- Bone resorption, with prolonged anticoagulation in CRRT, 1110-1114
- Botanical medicine, renal hazards from, 1-11
- Bradykinin, unmasking of hypotension by β -lactam during dextran sulfate LDL apheresis, 6:E107
- Brain natriuretic peptide, diagnostic/prognostic in CRF, 420-428
- Breast cancer patient, on immunosuppressive therapy with crescentic glomerulonephritis and dense deposit disease, 3:E33
- Breathing, sleep-disordered, proteinuria and, 636-641
- Calcific uremic arteriopathy, ischemic optic neuropathy in, 6:E93
